2019 represents a pivotal year as the path to the boardroom for women broadens, deepens and boards benefit from the vision, diversity of ideas and skills women bring.

This ENP Forum, our 5th Women's Summit, will cover both the preparation for board roles and "next practices" women already on boards are leveraging for success:

- Pathways to success – board qualifications, experience & development
- Making the right connections for board seats
- Improving board design for inclusion and improved decision making
