Transforming Leadership – A New Approach

Effective Leadership Behaviors for a Turbulent Economy

What strategy should executives adopt when the competitive or economic situation changes so dramatically and both growth and profitability are affected? At times like these, retreating into the safety of living in "Survival mode" to wait out the tough times *no* longer appears good enough. People and organizations are looking for direction, and craving a new approach to leadership.

Leadership Development methods must be re-examined and re-defined for a new economy and a new generation of leaders. This session features "live" case studies of improved profitability and growth by re-examining how leaders are developed, measured and held accountable.

Nov 3

Valarie Fleming, CNO Providence St Joseph Medical Center

Scott Anderson, SVP Training & Development, City National Bank

Lewis Lubin, Market Leader, Coaching, Right Management

Curt Grayson, VP Talent Development, Right Management

Lori Heffelfinger, Executive Coach, Right Management

Mark Steiman, CHRO, Kinecta

Our session will address the following subjects:

- Top 10 Leadership Behaviors for a New Global Economy: review the most effective senior leadership behaviors that can transform and drive your organizational performance in 2012
- Leadership insights from top area leaders: Edwards LifeSciences, Providence Health and Services, City National Bank and others as they share how they have enhanced their leadership development methods to tie talent strategies directly to business results.
- Transformational Coaching: How you can enhance your leadership competencies and manage the spectrum of challenges facing top leaders in turbulent times.
- Your number one Leadership Challenge: Share your leadership challenge and receive real-time coaching insights from your peers and top coach practitioners.

This session is specifically designed for the entire executive team and top advisors interested in "upgrading" their individual performance.
